Arctic Alaska Deepwater Carbon Burial During Mid-Cretaceous Oceanic Anoxia Events

Richard O. Lease

U.S. Geological Survey, Anchorage, AK

rlease@usgs.gov

The Hue Shale comprises condensed, organic-rich black shale and volcanic ash that blanketed the eastern Colville foreland basin in the Aptian–Maastrichtian (~115–70 Ma), reflecting deepwater conditions in the western Arctic Ocean. The Arctic occupied a unique position during the Cretaceous–Paleogene greenhouse phase as a newly-formed, partially-enclosed polar ocean basin with periods of high carbon burial but variable oxygenation, stratification, and productivity. Multidisciplinary Hue Shale research by a team of 15 USGS geologists over the past five years on the eastern North Slope provides a framework for Arctic source rock and paleoclimate studies. This talk presents new insights on the timing of Hue Shale organic carbon burial during global Oceanic Anoxic Events (OAEs) via correlation of carbon isotope chemostratigraphy and ash zircon U-Pb dates. Hue total organic carbon (TOC) increased by >30-100% during multiple Albian-Campanian OAEs (i.e., OAE1d, OAE2, Hitch Wood, OAE3a, b, c), and was accompanied by increases in marine carbon and productivity proxies. However, geochemical proxies suggest a long-term shift from marine salinity, oxygen minimum zone-like conditions to an increasingly brackish, restricted euxinic basin. I integrate these productivity, redox, and salinity records with the timing of sea level and shelf margin dynamics to examine changing environmental controls on polar greenhouse marine carbon burial.

AGS Meeting

Date & Time:	Wednesday, May 31; Doors open 11:30 am, announcements 11:45 am, talk 12:00 – 1:00 pm
Program:	Arctic Alaska deepwater carbon burial during mid-Cretaceous oceanic anoxia events
Speaker:	Richard Lease, U.S. Geological Survey, Anchorage, AK
Place:	Live presentation at the Energy Center and virtually online; 1014 Energy Court, Anchorage, AK
Reservations:	Reservations are not required
Login:	For instructions on how to log in see AGS website: http://www.alaskageology.org/events.html
How to Join:	Join with Google Meet: meet.google.com/msf-onof-noj or join by phone: (US) +1 262-468-7209, PIN: 158 151 062#

orthophoto by Jared Gooley, USGS

About the Speaker:

Richard Lease has been a Research Geologist with the U.S. Geological Survey in Anchorage, Alaska since 2012. His research addresses topics in sedimentary basin analysis, mountain building, landscape evolution, and paleoclimate with support from the USGS Energy and Minerals mission area. His favorite AK field locales include the Brooks Range, Alaska Range, Fairweather Range, and Yukon-Tanana Upland. He received an AB in Geosciences from Princeton University, a PhD from the University of California, Santa Barbara, and completed a postdoc at the University of Tuebingen in Germany. His prior research focused on tectonic-climatic-geodynamic interactions during Cenozoic growth of the Tibetan Plateau and Central Andes.

My Pet Rock

Dave Houseknecht
U.S. Geological Survey, Reston, VA

Glendonite crystals from the Sagavanirktok Formation exposed along Carter Creek on the Arctic Refuge coastal plain near Camden Bay. The strata here are Upper Oligocene or Lower Miocene based on seismic correlation to wells with biostratigraphic control. [Photo originally published in Alaska Geological Society Newsletter, v. 51, n. 9, p. 2, 2021].

Send a photo of your pet rock to: helmold@alaskan.com

Impact Crater Tectonics

The Future of Resource Exploration

David Buthman

Impact Crater Tectonics provides a universal geologic framework for the prediction of Earth's mineral resources. Based on sound scientific, mathematic, and geologic principles, the demonstrated relationships between impact craters and mineral resources consecrates an imminent paradigm shift for interpreting the tectonic evolution of Earth, particularly for Alaska.

Full-color, 297-page, 8.5" x 11" perfect-bound book, with over 200 photos, graphs, and illustrations. Available on Amazon, or signed copy from author at ImpactCraterStudies.org.

Pathfinders in Alaska Geology Wall of Fame

The geology of Alaska is exceptionally diverse and complicated. Mapping and understanding Alaska geology are further challenged by remoteness, rugged terrain, severe weather and limited infrastructure. A Pathfinders in Alaska Geology award has been established to recognize outstanding geoscientists that have risen above these difficulties and contributed significantly to synthesizing and understanding the geology, hazards, and resources of the state. These geoscientists will be honored with a photograph and citation on the Alaska Geological Society website and on a dedicated wall in the Geologic Materials Center in Anchorage, Alaska.

It is with great honor, pleasure, and humility that the Alaska Geological Society's Pathfinders Committee announces the inaugural class of "Pathfinders in Alaska Geology". This award was established to recognize true trailblazers in the geosciences in Alaska; men and women who made enormous contributions to the general understanding of the geology of the Last Frontier.

The thirty individuals listed at left are inducted as the first Pathfinders class; they will be honored with a permanent display at the Alaska Geologic Materials Center in Anchorage. There also will be an annual dedication ceremony for newly inducted Pathfinders at the Alaska Geological Society's Annual Technical Conference. This year's conference will be held at the University of Alaska-Anchorage on April 22nd, 2023.

The composition of this first class was determined after several months of research and deliberation by a committee of 9 long-time Alaskan geologists. Following the 2023 AGS Technical Conference, the nomination process for future inductees will be posted and open to the public.

Congratulations to the inaugural class – we thank you for your efforts.

HEROES OF ALASKAN PALEONTOLOGY – A TRIBUTE TO VINCENT L. SANTUCCI, THE “PISTOL-PACKING PALEONTOLOGIST” AND “FATHER OF NATIONAL FOSSIL DAY”

Robert B. Blodgett¹, Justin Tweet², and John-Paul Hodnett³

Vincent Santucci is the senior Paleontologist and Paleontology Program coordinator at the National Park Service

This note honors Vincent L. Santucci, an outstanding paleontologist who has done much to further the knowledge of paleontological resources throughout the U.S. National Park Service (NPS) including the national parks in Alaska. Vince was born 1958 in Pittsburgh, Pennsylvania and is of Sicilian and Scotch-Irish ancestry. He is currently the NPS Senior Paleontologist and Paleontology Program Coordinator based in NPS head-quarters in Washington, D.C. Vince lives in Gettysburg, Pennsylvania, fittingly for a great American Civil War buff. He lives on edge of the battlefield, and gives a superb walking tour of both the Park and Battlefield. His research background in paleontology focused on Cenozoic vertebrates and biostratigraphy, however he has become a generalist to support the diverse fossils across the NPS.

Vince joined the NPS in 1985 at Badlands National Park, South Dakota, where he completed his graduate field research. Santucci returned to the University of Pittsburgh to complete his master’s

degree and complete training to obtain a federal law enforcement commission. Santucci has served as the federal government's only sidearm-carrying paleontologist, helping protect our nation's fossil resources while stationed at seven different national parks during his more than 30 year career (earning him the sobriquet "The Pistol-Packing Paleontologist."). In recognition of his strong support of the paleontological sciences, two fossil species – *Androcycas santuccii* (from Petrified National Park) and *Sapelnikoviella santuccii* (from Glacier Bay National Park & Preserve) – have been named in his honor.

Santucci has also strongly encouraged cooperation with many non-NPS paleontologists to work on NPS park units in the State of Alaska, including Robert B. Blodgett, David M. Rohr, Anthony Fiorillo, Roland Gangloff, Pat Druckenmiller, and Montana S. Hodges. He has actively been collaborating on Alaska-based NPS studies since 2000. Through Santucci's advocacy and collaboration, he has helped to better understand the scope, significance, distribution (both temporal and geospatial) and management issues associated with fossils in the Alaska national parks. A synoptic summary follows on his professional background.

EDUCATION

Ph.D. Candidate – Recreation, Parks & Tourism Management, Penn State University

M.S. Geology & Paleontology, University of Pittsburgh, 1991

B.S. Anthropology / Biology; University of Pittsburgh, 1981

WORK EXPERIENCE: Thirty-year career with the National Park Service including assignments in seven parks including: Badlands National Park, Petrified Forest National Park, Grand Canyon National Park, Yellowstone National Park, Fossil Butte National Monument, George Washington Memorial Parkway, and Tule Springs Fossil Beds National Monument as well as the NPS Geologic Resources Division. He has supported paleontological resource work in 286 NPS park areas. He has also served in a wide range of professional positions involving science, stewardship and resource management including:

- Senior Paleontologist / Geologist, NPS Geologic Resources Division, 2011–date;
- Superintendent (detail), Tule Springs Fossil Beds National Monument, 2015;
- Chief Ranger, George Washington Memorial Parkway, 2003–2011;
- Chief Ranger and Acting Superintendent, Fossil Butte National Monument, 1997-2003;
- Inventory & Monitoring Network Coordinator (detail), Greater Yellowstone I&M Network, 2002;
- Natural Resources Training Manager (detail), Horace Albright Training Center, 2002;
- Park Ranger (Law Enforcement), Yellowstone National Park, 1996;
- Faculty Instructor, Department of Parks & Recreation, Slippery Rock University, 1994-1995;
- Resource Management Specialist (Planning), Grand Canyon National Park, 1993-1994;

- Chief Natural / Cultural Resource Management / Paleontologist / Curator, Petrified Forest, 1991-1993;
- Park Ranger (Interpretation), Badlands National Park, 1985-1986;

TEACHING EXPERIENCE: In addition to Vince's teaching experience working for the National Park Service, he has served as an instructor at the Federal Law Enforcement Training Center and an instructor at Slippery Rock University in Slippery Rock, Pennsylvania. He has held a number of part-time instructor positions including Allegheny Community College, Harrisburg Area Community College, Northland Pioneer College, Western Wyoming Community College, University of Pittsburgh, Carnegie Museum of Natural History and Yellowstone Institute. One of his favorite courses to teach was Geology of the National Parks taught as an honors course at the University of Pittsburgh.

VINCE'S PROFESSIONAL SOCIETY MEMBERSHIPS:

- Society of Vertebrate Paleontology (SVP)
- Paleontological Society (PS)
- George Wright Society (GWS)
- Gamma Sigma Epsilon – Honorary Earth Science Society
- Association of National Park Service Rangers (ANPR)

AWARDS:

Received a number of recognitions and awards for accomplishments and contributions to the NPS including: Superior Service Award, George Hartzog Award, George Wright Society Resource Management Award, Intermountain Region's Small Park Resource Management Award, Brunton Compass Award, Hecht Safety Award, Leave No Trace Public Hero Award, various performance and STAR awards, and nominated for the NPS Harry Yount Award.

NATIONAL FOSSIL DAY:

In addition to his normal professional duties as an NPS Paleontologist, Vince was instrumental in the establishment of National Fossil Day (NFD). Wikipedia provides the following discussion of this day:

“National Fossil Day was established in the United States by the National Park Service during 2010 as a celebration and partnership to promote the scientific and educational values of fossils. The first annual National Fossil Day was hosted on October 13, 2010, as a fossil-focused day during Earth Science Week. The National Park Service, the American Geosciences Institute, and more than 420 partners, including museums, institutions, science and teacher organizations, agencies, fossil sites, amateur fossil groups and other entities, joined together in a partnership to educate the public about fossils, the science of paleontology and America's Paleontological Heritage. There are National Fossil Day partners in all 50 states providing opportunities for educational outreach and hosting hundreds of fossil-themed activities at the local level.

National Park Service senior paleontologist Vincent L. Santucci is considered the “Father of National Fossil Day” and first proposed the concept of National Fossil Day in 2009 as a nationwide celebration for fossils in the United States. Santucci reached out to Geoff Camphire and Ann Benbow at the American Geosciences Institute (AGI) seeking support to establish National Fossil Day as a dedicated day during Earth Science Week. Once the idea of National Fossil Day was approved, dozens of organizations and museums joined this partnership including the Geological Society of America, Paleontological Society, Society of Vertebrate Paleontology, Smithsonian, and American Museum of Natural History. The National Fossil Day Celebration on the National Mall in Washington, D.C., was the kickoff event hosted on October 13, 2010. The event captured widespread media and public attention throughout the U.S.”

Today, National Fossil Day has become an important celebration of our national fossil heritage and promotes public educational outreach of paleontology to American citizens. National Fossil Day Partners each year put on special NFD events and programs as part of their annual planning. National Fossil Day has been critical in promoting the importance of stewardship of fossil resources in our country to people of all ages.

PUBLICATIONS

Vince has a very impressive publication record, including over 270 peer reviewed publications and reports; 15 edited volumes; and over 154 conference abstracts. He established Park Paleontology Newsletter in 1988, while a graduate student to communicate the importance for the management and protection of paleontological resources from public lands, including national parks. Vince’s publications involving Alaskan paleontology are provided below:

Alaska Geological Society

SEEKING DONATIONS FOR AGS SCHOLARSHIP FUNDS

This is a challenging year for students at all levels, and geoscience students in the universities need our support more than ever. When you pay your membership dues this year, please consider a contribution to an AGS scholarship fund. You can also contribute to AGS scholarships through Pick, Click, Give when you apply for your Alaska Permanent Fund Dividend. **AGS is a 501c3 nonprofit organization and all contributions are tax deductible.**

The Alaska Geological Society offers scholarship awards
to graduate and undergraduate students
who are conducting geoscience research projects in Alaska

including

Alaska Geological Society Scholarships

The Don Richter Memorial Scholarship

Scholarship information and applications are available online at
www.alaskageology.org

The Alaska Geological Society, Inc.

MEMBERSHIP INFORMATION

AGS annual memberships expire November 1. The annual membership fee is \$25/year (\$5 for students). Lifetime membership is \$250. You may download a membership application from the AGS website and return it at a luncheon meeting, or mail it to the address above.

Contact membership coordinator Kirk Sherwood with changes or updates (e-mail: membership@alaskageology.org; phone: 907-240-2546)

All AGS publications are now available for on-line purchase on our website. Complete catalogue at: <http://www.alaskageology.org/publications1.html>

ADVERTISING RATES

Advertisements may be purchased at the following rate: \$200 for 9 monthly issues (September - May) of AGS newsletter (any size up to full page) and companion ad on AGS website for full year (beginning each September).

Contact Jennifer Crews at jennifer.r.crews@conocophillips.com to place ad.

Pick.Click.Give.

It's PFD Application Time!

Did you know that you can support the society through Pick.Click.Give? When you fill out your PFD application, just select Alaska Geological Society, Inc. in the list of non-profits and you can help AGS to promote the uniqueness of Alaskan Geology and provide for education, geologic research, and networking to all who are interested as well as provide scholarships to students across a wide range of geologic topics.

<https://www.pickclickgive.org/index.cfm/pfdorgs.info/Alaska-Geological-Society-Inc>

- From the PFD home page <http://pfd.alaska.gov/Application>, select the green "Add or Change Your Pick.Click.Give. Donation" button
- You can change/add your donation at any time throughout 2021
